Opaque finishes are distinctly different from standard finishes. On wood products, expansion and contraction are typical due to changes in climatic conditions causing finish breaks, slight recesses, and seam lines at stile, rail, and panel joints. Joint separation may be more apparent on mitered doors; therefore, opaque finishes are not recommended for use in environments of high humidity. Seam lines and variations are normal characteristics of opaque finishes and will not be considered reasons for product replacement.

Cabinetry used with or near water sources, such as sink bases, need special attention in regards to care and cleaning. Avoid draping damp or wet dish towels over the door and/or drawer front. Prolonged exposure to spills, including: food, oil, grease, water, coffee, tea, food colorings, and/or other liquids may cause permanent discoloration or damage to the finish. Omega's Lifetime Limited Warranty does not apply in cases where product has been exposed to the above elements thus resulting in damage to the product.

NOTE: When an opaque finish is ordered, Maple, MDF, or MDF with Furniture Veneer may be used in place of the selected hardwood for door center panels, drawer front center panels, or the entire drawer front for reasons as follows:

1. When the center panel of a five piece drawer front is less than 2", MDF with Furniture Veneer will be used instead of hardwood for construction safety reasons.
2. Slab drawer fronts are always constructed of solid MDF.
3. Five piece door styles, including those with standard Furniture Veneer center panels, will have a solid MDF center panel and a hardwood frame.

If several of the above statements apply, the larger numbered statement takes precedence over the lower numbered statement(s).

Opaque finishes are available with hand applied brush stroke technique finishes:

If a Brushed Ebony or Brushed Sepia with your opaque finish, please read the following to better understand the uniqueness of these applications.

Brushed Ebony and Brushed Sepia are two colors of a hand brushed technique applied to the contrasting opaque base color. The brushed application is designed to give depth and movement to the base color. Depending on the combination selected, the finished look can range from an aged, weathered appearance to a modern, contemporary look. Brushed Ebony and Brushed Sepia are only available on select opaque finishes: Dove, Magnolia, Oyster, Pearl, Pure White, Rain, or Wafer on Maple.

I have read and understand the above agreement and find that the characteristics of the opaque or opaque glazed and/or brushed finishes and the possible substitution of Maple, MDF, or MDF with Furniture Veneer are acceptable. I understand that Omega Cabinetry will not be held responsible in the event that these characteristics are later found by me to be less desirable than expected.
