Due to the variety of computer monitors and desktop color printers, combined with the limitations of Internet technology, the perception of images varies.

Disclaimer

NOTE: These images are imagination aides only and not to be taken literally for sizes or colors. Pictures are often distorted or stretched as the software renders camera angles and perspective views of the project. Also colors are subject to the monitor or screen resolution you view them on and are not necessarily available in real products.

Additionally, items are occasionally added to the images to give them a pleasant or realistic feel and are not included in your project pricing. Check your contract /work order for the items included in your agreement.

We want you to be enthusiastic about your remodel design and have invested in the software to help you visualize the appearance of your project renovation. While we do our best to make sure your cabinets are shown as they will be, often your choices may cause changes to what is available in color or style from that cabinet maker.

Tiles shown are in the software library and not always current with the tile manufacture or suppliers inventory. They are conceptual images only.

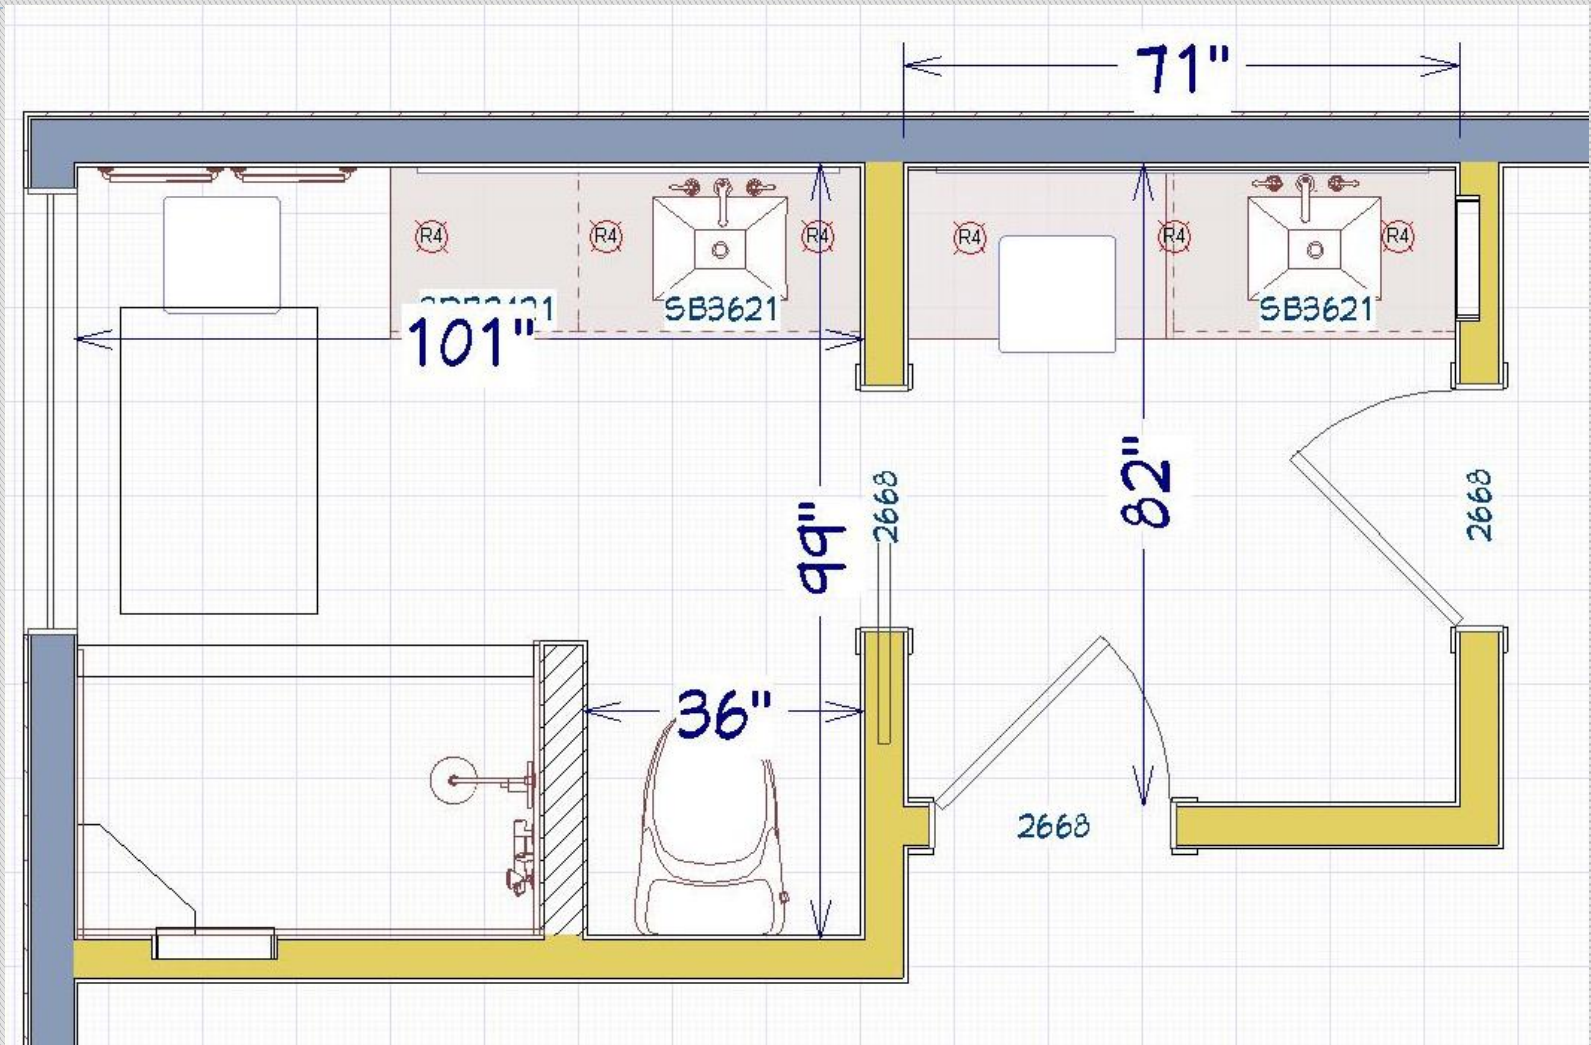

Project notes:

- Who is the one person we will go through for decision and information throughout the project?
- Does anyone have any allergies, medical conditions or special needs?
- What pet accommodations need to be considered during the renovation?
- We will need a key provided for our lock box to allow our project manager access the project site.
- Are there any upcoming events, parties, visitors etc – (need dates)
