

Henzel Tile

Clay tile floor

Dark without enhancer

Medium without Enhancer

Note:

- Matching 20 year old tile is possible. Even if we had the original the exposed age and cleaners have altered the finish color a bit.
- If you had to replace the balance of the kitchen one option is to use the new clay tile and install it on a diagonal in the kitchen. It would hide the difference in color if there is one.
- I have more sources to check with but as I thought there are still clay tile available that will work once they are grouted and sealed with enhancing gloss finishers.
